

# Bold Bats!

- First ask an adult to help you cut out the shape of the bat, which is drawn on the black card.
- You should now have a piece of card with a bat shaped hole in it.
- Cut the tissue paper in your pack into strips . They can be thick or thin or a mixture of both.
- Put the picture facing down and start to add the tissue paper strips so they are crossing over the bat shaped hole in the card.
- They can be vertical, horizontal or even diagonal across the page. Make sure they are long enough to reach the other side!
- Only put the glue on the ends of the tissue paper that you need to stick to the card.
- Put it on your window and watch the light shine through and light your bat up.
- We have a step by step video demonstration online on our website at <https://www.armyflying.com/education/home-learning-fun>

We would love to see your bats.! Please ask an adult to post them to our Army Flying Museum Face Book page or email them to
