

KOREAN OBS

An hour from the Unicorn , the Dragon's Teeth in sight

The dawn is gently breaking as I fly out of the night

Cameras set on ready to see what I can find

Tank movement from the North or soldiers laying mines

I bank the Auster round to get a better view

It's not the same as yesterday, today there's something new

Get as many good shots as I can so that we can see

Exactly what co-ordinates to give artillery

What's that moving up ahead deep inside the gorge

Snap it and get out of here pictures to Fort George
